NOTIFICATION DATE		DELIVERY MODE		
06/17/2008		ELECTRONIC		

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

docket1@thepatentattorneys.com  
hholmes@thepatentattorneys.com  
lpasterchek@thepatentattorneys.com

### Office Action Summary

**Application No.**

10/769,103

**Applicant(s)**

BODORIN ET AL.

**Examiner**

TESHOME HAILU

**Art Unit**

2139

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 26 March 2008.  
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-24 is/are pending in the application.  
4a) Of the above claim(s) 2, 3, 5 and 6 is/are withdrawn from consideration.  
5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.  
6) ☒ Claim(s) 1, 4 and 7-24 is/are rejected.  
7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.  
8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.  
10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☐ All b) ☐ Some \* c) ☐ None of:  
1. ☐ Certified copies of the priority documents have been received.  
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)  
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)  
3) ☐ Information Disclosure Statement(s) (PTO-8508)  
Paper No(s)/Mail Date \_\_\_\_\_  
4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_  
5) ☐ Notice of Informal Patent Application  
6) ☐ Other: \_\_\_\_\_

**DETAILED ACTION**

1. This office action is in reply to an amendment filed on March 26, 2008.
2. Claims 2, 3, 5 and 6 are withdrawn from consideration.
3. Claims 7-24 have been added
4. Claims 1-24 are pending.

***Response to Amendment***

5. Applicant's arguments with respect to claims 1, 4 and 7-24 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 112***

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

7. Claim 10 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification fails to mention or teach that the type of memory "Random access memory", "a quarantine area of a hard drive" and logical partition of a hard drive. Appropriate correction is required.

Art Unit: 2139

8. Claim 14 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification fails to mention or teach that the type of network (wired or wireless), CD-RW, DVD-ROM disk and DVD-RW disc. Appropriate correction is required.

***Claim Rejections - 35 USC § 103***

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 1, 4 and 7-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lucas et al (US 6,968,461) in view of Thacker (US Pub. No. 2002/0035696).

As per claim 1 Lucas discloses:

A computer implemented system for determining whether a packed executable is malware, the system comprising: (column 3, line 63-67, FIG. 2 illustrates virus scanning operation when access is made to a compressed computer file 18. In order that this compressed computer file 18 can be properly checked it is decompressed into an uncompressed file form 20 and then a sequence of tests corresponding to separate DAT driver files within the virus definition data 16 are applied to the uncompressed data).

An unpacking module that receives a packed executable from the malware evaluator and returns an unpacked executable corresponding to the packed executable; (column 4, line 22-25, a determination

is made as to whether or not the portion of data recovered from the computer file being scanned requires decompressing or unpacking prior to testing. If the data does require decompressing or unpacking, then this is performed at step 26).

Wherein the malware evaluator, upon receiving incoming data, can at least in part determine whether the incoming data is a packed executable, and if so, the malware evaluator provides the packed executable to the unpacking module such that an unpacked executable can be received from the unpacking module such that the malware evaluator can determine whether the unpacked executable is malware. (Column 4, line 22-25, a determination is made as to whether or not the portion of data recovered from the computer file being scanned requires decompressing or unpacking prior to testing. If the data does require decompressing or unpacking, then this is performed at step 26).

A malware evaluator for determining whether incoming data is malware, wherein the incoming data directed to a computing device is intercepted by the malware evaluator; (column 2, line 50-55, a receiver operable to receive a request to scan a computer file for computer viruses; initiating logic operable to initiate a virus scanning operation upon said computer file).

Lucas does not explicitly disclose about intercepting the incoming data directed to a computer device. However, in the same field of endeavor, Thacker teaches this limitation as, (page 1, paragraph 9, the system comprises a computer 11 which is connected to the Internet or other network of computers 12, with a virus trap 13 connected between the computer and the network for preventing viruses from entering the computer from the network).

Therefore, it would have been obvious to one of ordinary skill in the art, at the time of the invention was made, to modify the teaching of Lucas and include the a way of intercepting the incoming data is a malware using the teaching of Thacker in order to prevent a virus from entering the computer from the network (see paragraph 7 of Thacker).

Claim 4 is rejected under the same reason set forth in rejection of claim 1:

As per claim 7 Lucas in view of Thacker discloses:

The system of Claim 1, wherein the returned unpacked executable corresponding to the packed executable is based at least in part on code or data derived from employing an unpacker other than the loader/unpacker received with the packed executable. (Column 3, line 1-6, the anti-virus system 12 requests a portion of the compressed file 18 to be decompressed and then applies the tests to that decompressed portion. If further portions still requiring checking, then more of the compressed file is decompressed and checked).

Claims 8, 20 and 21 are rejected under the same reason set forth in rejection of claim 7:

As per claim 9 Lucas in view of Thacker discloses:

The system of Claim 1, wherein the intercepted incoming data resides only in one or more logically or physically isolated memory stores such that the intercepted incoming data can be located at a computer but does not actually "reach" the computer. Thacker discloses about intercepting incoming data as, (page 1, paragraph 9, the system comprises a computer 11 which is connected to the Internet or other network of computers 12, with a virus trap 13 connected between the computer and the network for preventing viruses from entering the computer from the network).

Claims 10, 14 and 22 are rejected under the same reason set forth in rejection of claim 9:

As per claim 11 Lucas in view of Thacker discloses:

The system of Claim 1, wherein the unpacked executable generated by the unpacking module corresponds to a complete packed executable and not just a portion thereof. (Column 4, line 22-25, a determination is made as to whether or not the portion of data recovered from the computer file being scanned requires decompressing or unpacking prior to testing).

Claim 24 is rejected under the same reason set forth in rejection of claim 11:

As per claim 12 Lucas in view of Thacker discloses:

The system of Claim 11, wherein the generated unpacked executable corresponding to a complete unpacked executable is unpacked without executing any portion thereof. (Column 4, line 22-25, a determination is made as to whether or not the portion of data recovered from the computer file being scanned requires decompressing or unpacking prior to testing).

Claim 23 is rejected under the same reason set forth in rejection of claim 12:

As per claim 13 Lucas in view of Thacker discloses:

The system of Claim 1, wherein the malware evaluator determines whether the incoming data is malware without unpacking the incoming data if the incoming data is determined not to be a packed executable. (See fig. 6 of Lucan about scanning with out the decompression and unpacking).

Claims 15 and 19 are rejected under the same reason set forth in rejection of claim 13:

As per claim 16 Lucas in view of Thacker discloses:

The system of Claim 15, wherein anti-virus software can be employed in determining whether the incoming data is malware. (Column 5, line 28-31, a portion of the computer file 64 to be tested is then subject to the processing associated with a series of DAT drivers within the computer virus definition data 16 of the anti-virus system 12).

As per claim 17 Lucas in view of Thacker discloses:

The system of Claim 16, wherein the determining by anti-virus software can be by signature or pattern recognition processes. (Paragraph 50-55, within the anti-virus system 12, an anti-virus engine 14 working with virus definition data 16 serves to apply a plurality of tests for different known viruses and virus like behaviors to the computer file in order to detect the presence of a computer virus within that computer file).

As per claim 18 Lucas in view of Thacker discloses:

An electronic device comprising the system of Claim 1, such that the electronic device can be placed between a network and a computer device to facilitate intercepting data directed to a computing device. (page 1, paragraph 9, the system comprises a computer 11 which is connected to the Internet or other network of computers 12, with a virus trap 13 connected between the computer and the network for preventing viruses from entering the computer from the network).

### ***Conclusion***

11. The prior art made or record and not relied upon is considered pertinent to applicant's disclosure.

TITLE: Detecting computer programs within packed computer files, US Pub. No. 2003/0023865.

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 2139

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TESHOME HAILU whose telephone number is (571)270-3159. The examiner can normally be reached on Mon-Fri 7:30a.m. to 5:00p.m. PST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kristine L. Kincaid can be reached on (571) 272-4063. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
